

1.3 Geometric sequences and series

1.3.1 Enter a sequence on your calculator

Suppose you want to enter the sequence $u_n = u_1 * (\frac{1}{2})^n$ with $u_1 = 0.3$ on your calculator.

- ① Create a new document, press  and select Add Calculator.
- ② Press , select Actions > Define.
- ③ Type 'u(n)', then write the expression of the sequence

1.3.2 Enter a sequence on your calculator (recursive definition)

Suppose you want to enter the sequence $u_n = \frac{1}{2} * u_{n-1}$, with $u_1 = 0.3$ on your calculator.

- ① Create a new document, press  and select Add Calculator.
- ② Press , select Actions > Define.
- ③ Type 'u(n)', press  and select .
- ④ On the first line, write the initialization. On the second line, write the recursive expression.

1.3.3 Graph a sequence

Suppose you want to display the graph of the sequence $u_n = u_1 * (\frac{1}{2})^n$ with $u_1 = 0.3$ on your calculator, starting at $n = 1$ and ending at $n = 20$.

- ① Create a new document, press  and select Add Graphs.
- ② Press , select Graph Entry/Edit > Sequence > Sequence
- ③ In the first line, write the expression of the sequence. In the second line, write the number of initial terms.

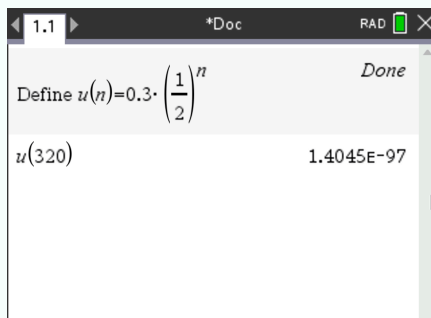

- ④ Press  and the graph of the sequence is displayed.

1.3.4 Compute a term of a sequence

Suppose you want to know the 320th term of the sequence $u_n = u_1 * (\frac{1}{2})^n$ with $u_1 = 0.3$.

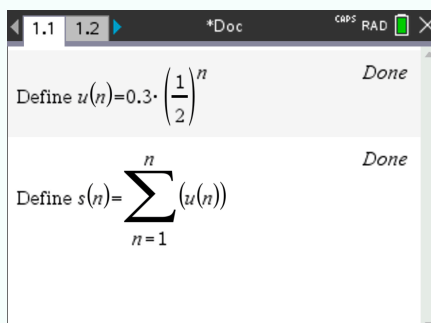

- ① Enter the sequence on your calculator (see ③)
- ② Press  and write 'u(320)' in the following line.

1.3.5 Graph a series

Suppose you want to graph the series of the sequence $u_n = u_1 * (\frac{1}{2})^n$ with $u_1 = 0.3$ on your calculator, starting at $n = 1$ and ending at $n = 20$.

- ① Enter the sequence on your calculator and press .
- ② Enter the series of the sequence in the line below. To do this, define 's(n)=' and press .
 .

- ③ Create a new document, press  and select Add Graphs.
- ④ Press , select Graph Entry/Edit > Sequence > Sequence

⑤ In the first line, write $s(n)$. In the second line, write the number of initial terms.

⑥ Press  and the graph of the serie is displayed

1.3.6 Compute the value of a series

1. Enter the sequence on your calculator (see ③)
2. Enter the series of the sequence in the line below.
3. Type ' $s(20)$ ' to set the ending of the serie at 20. Press  . The result should be 0.3.
